The CSE Club Youtube

PC Design
Workshop Friday, April 17th, 2020 @ 3 pm;
Want to design and also learn how to build your own PC? In this workshop we will do just that. With this simple to follow workshop we will look over how to design a pc, build that pc and maintain it as well. During the workshop we will be looking over the components needed and the resources that many people use to design their PC. At last you will be well on your way to have your own custom PC.
Hosted by: Jacob

Web Design Tutorial
Workshop Friday, April 24th, 2020 @ 1 pm;
We'll go over the basics of website design with HTML CSS and JavaScript. This tutorial covers HTML CSS and JavaScript and how to implement them together.
This prerecorded tutorial will be up on the 24th between 12 to 1 on the CSE YouTube channel.
A 30 QnA zoom meeting will be after (around 1:30)
Hosted by: Tyler

Arduino Workshop
Workshop Friday, May 1st , 2020 @ 4 pm ;
We wanna show how it's like to use an arduino and why it can be used instead of designing on expensive hardware.
Why would we use an arduino? How far can we go without one?
Hosted by: Montana

Networking Workshop
Workshop Friday, May 8th, 2020 @ 3 pm;
Overviewing resources such as Github and Way Up to help post portfolios and help outsource yourself
Hosted by: Zion

Programing Languages Workshop
Workshop, Friday, May 15th 2020 @ 2 pm;
If you have ever worried about not knowing the right programming language, look no further! In this live stream we will cover the basics of programing in C++ and python as well as some key features that make both languages unique!
Hosted by: Andrew and Hugo
